Since Thirugnanasambandar has sung hymns in praise of Lord Shiva of this temple, the original temple might have existed before the 7th Century and later the same was reconstructed as a stone temple during The Chozha period.

As per the Sundara Pandyan Period inscription found on the sanctum wall, this place was called Jayankonda Chozhavalanattu Veezhainattu Rajanaraya Chathurvedimangalam Pariyalur and Lord Shiva was

called Thiruveerattanamudayar and Dakshesamudayar. During the Krishna Devaraya period, inscriptions of Soolavari (Taxes) were collected from some of the Villages, which includes Pariyalur and given to Shiva and Vishnu temples for feeding to devotees and travelers. 30 Veli Land was gifted to this temple and also land was allotted for establishing an agraharam at Ezhumuzhuthumudaya Chathurvedi mandalam. Maha Kumbhabhishekam was conducted after renovations in the year 2011.

PREDICTION FOR THIS WEEK 12.04.2025 TO 18.04.2025

Tolerance- the virtue par excellence

The tendency to withhold everyone's weaknesses; not to face their weaknesses is the tendency to tolerate and to give power. Hence, it is called, 'the power of tolerance'. To tolerate is to fill [yourself] with power and to give power [to others]. You have to tolerate everything [including] victory, praise, defeat, cold, heat. Now, this entire world is degraded. These elements are also degraded. So, they will only keep giving sorrow. There are some people who immediately come under the influence of praise and defamation. There is a lot of outwardly show. If someone says anything, they become agitated immediately. They become so agitated that their sleep also vanishes. To tolerate doesn't mean to die. Many think: I will ultimately die while tolerating. Do you have to die? However, it is not dying. It is rather living in everyone's heart.

No matter what kind of an opponent someone is, he might be stronger than Ravan, you might have to tolerate not once but ten times, the fruit of the power of tolerance will be imperishable and sweet. He will also definitely change. Just don't have this feeling: when I have tolerated so much, he should also tolerate a bit. Don't have the tendency [to enjoy] the fruit of a short period. Be merciful. Tolerating means not to confront anyone. You shouldn't feel sorrow at all, you shouldn't shed tears either, it is then that it will be said that you have tolerated completely. The biggest tact is to assimilate the virtue of tolerance. God tells us this tact which makes us move ahead. You will be able to bring your kingdom, the Golden Age to the extent you become tolerant; you have the power of truthfulness. Surdas, Kabirdas, Tulsidas have written very nice couplets. 'The one who defames us, he is our friend.' You make friendship with him. Generate good thoughts [for him]. Give him gifts for his good deeds. If you do good, you will receive good [in return] for many births. The one who does bad, speaks bad [words] will receive bad [in return]. In fact, God has given us a direction: don't

speak bad [words], don't see bad [things and] don't listen to anything bad.

If someone is unjust to us, should we tolerate it or confront it? [Check] are we a soul or a body? We are a soul. Did the soul have many births or does it have the karmic accounts of just one birth? So, when you remember the soul - along with the soul, there are many previous births connected- you remember them as well. Can anyone be unjust to the soul? No. Whatever we have done, we receive its very result. It is because we souls are the children of God. For example, if there is the eldest child of the Supreme Judge, he will be full of pride [thinking:] can anyone be unjust to me? Will anyone dare to do so? He won't. So, similarly, we too should feel proud: whose children are we? We are the children of the Highest of the High Father. If someone is unjust to us, what will be its result? Whoever confronts us will be destroyed at once.

What should we do so that the quality of tolerance increases in us?

Practice; after waking up in the morning you should make a vow: Today, I have to assimilate this [particular] quality the whole day. And then check its result in the evening. The author is solely responsible for this article. The publisher or editor are not responsible.

Know more about ATM withdrawal charges

Starting May 1 customers using ATM banking services will have to pay higher charges for transactions beyond their free monthly limits. The Reserve Bank of India (RBI) has announced that the fee per ATM transaction will increase from 021 to 023, making cash withdrawals more expensive for users exceeding their free limits.

Under the revised guidelines, customers will continue to receive a set number of free transactions at both their own bank's ATMs and other banks' ATMs before incurring charges.

Free Transactions at Own Bank's ATMs: Customers can avail five free transactions (including both financial and non-financial) per month.

Metro cities: Three free transactions per month. Non-metro areas: Five free transactions per month. Charges Beyond Free Limit: After exhausting the free

transactions, each additional ATM withdrawal will now cost 23 per transaction instead of 21. With the increase in ATM withdrawal fees and limited free transactions, customers may look for alternative payment methods to avoid additional costs. This could

lead to a higher adoption of digital payment modes.

fter natural calamities concerned A authorities ignore cut trees and leave the stump ignored. The dump is not cleared. This remains for long at 12th Avenue, Ashok Nagar. The hydraulic users easily lift and move logs and wood without having to deal with the hassle of manual labour. The city corporation has approached the Metal Scrap Trade Corporation, a public sector undertaking company, to handle the tender process. There is a danger that wooden logs are stocked to prevent any fire outbreak. Residents express concern over the worsening pollution.

Removal of legacy waste is a herculean task. The problem with legacy waste is that it makes the soil and water completely unusable. While dealing with the legacy waste, fresh waste which remains unsegregated pose a huge challenge and further complicate the process. Dumps gradually decomposes by a combination of biological, chemical and physical processes which affect the environment. The process of decomposition creates anaerobic conditions.

The idea of taking such an initiative is to discourage the general public from damaging the structures, official opinions. Themes differ accordingly and its importance, he added. We expect public not to stick posters on this median to avoid legal action.

Construction debris dumping must stop

Construction debris along a stretch on the roadside of Natesan Nagar, 4th Cross Street, Virugambakkam is an eyesore. Its location has become convenient to dump construction waste. The construction debris can be used by the civic body for filling potholes at least. Even though the dumping of gravel and construction debris is not the solution these fillings will at least last more than a few months, residents opine. They complain that road debris is a form of a road hazard. They suggest that the construction waste must be compacted as shortcut tactics lead to bumps across the street. Huge waste generation has become a major challenge as they undergo tremendous expansion. Construction boom comes with growing pains from escalating construction and demolition waste generation. Enormous construction waste causing much worry to the residents. Failure to adequately manage waste will lead to safety risks, residents opine.

City playgrounds get a hidden rainwater harvesting boost

Chennai's playgrounds are getting a hidden upgrade. Beneath the fields where children play cricket and football, the city is building massive underground rainwater harvesting tanks using EcoBloc Techology. Each tank can store up to five lakh litres of rainwater enough to support 45 mid-sized families. These tanks aim to reduce flooding during heavy rains and gradually recharge the groundwater. The initiative is part of a new project by Greater Chennai Corporation to conserve rainwater and improve city's flood resilience, without disrupting how the playgrounds are used. 'The tanks, based on German technology and made from recycled polypropylene. It is funded by the National Disaster Management Authority (NDMA) and aims to turn the city into a sponge that soaks up rainwater rather than letting it flow into drains and out to sea. The tanks are being installed under the Ashok Nagar Indira Colony play ground. It was implemented early in Vadapalani Temple Tank. Thus the storage capacity improved significantly. Once completed, the surface of the playgrounds will be restored to their original state.

Pedestrians and commuters find difficult in the night time as SWD work in Rajaji Avenue, 3rd Cross Street Junction,

Valasaravakkam under progress. The concern authorities have not barricated the place. Residents requests the authorities to barricate the dug up area properly before any untoward incident happen.

for drinking, dumping waste and as an open air toilet rendering the footpath useless. Located in a residential area opposite to Amma Canteen of Division 29 in Ward 129 of Zone 10, the bus stop has become a spot to worry about, says Jeevanantham, a long time resident. The residents are fed up because the space between is also being misused. No action from the authorities even after regular complaints, he lamented. Now buses do not stop here, says Kala, a long time resident. At present bus stops for bus route number 17 E and 17 K are located on both sides of the abandoned bus stop a few meters away. It is completely ignored now, he lamented.

Action must be taken without delay to demolish the abandoned bus stop and bring relief to those living nearby, says Rajkumar, another resident. At least pedestrians will have a better pathway. At present they risk themselves walking on the main road to avoid the bus stop, he lamented.

Abandoned bus shelter had become a night shelter for many homeless people. It has turned into a breeding ground for mosquitoes and stray animals, says Muthu, a long time resident. Locals complained that there is no respite from the unhealthy environment, which causes children and elders health problems. One of the vendors told Kodambakkam Times that they were trying to stop people who urinate in the absence of public toilets, due to which the place stinks a lot. The place is not cleaned regularly by the area conservancy workers.

The bus stand, which was once a centre of activity, has now been turned into a dumping yard with the foul smell emanating from the heap of garbage, complains Margret, a homemaker. Garbage from other areas is dumped here without our knowledge, she added.
